OFFICIAL APPLICATION FOR LEADERSHIP ICMA

Overview

Leadership ICMA is an intensive, two-year program designed to cultivate key competencies needed for successful leadership at all levels of local government management. These competencies include: personal leadership; integrity and ethics; team building; advocacy, analytical skills, community building, communication, and media relations; strategic planning; negotiation skills; initiative, risk taking, vision, creativity, and innovation. The program also facilitates networking within the profession and enhances connections between local government managers and their professional association. Six class modules are scheduled over the course of the two-year period, including a capstone that requires participants to demonstrate their competence in the concepts presented throughout the Leadership ICMA program. Each module requires considerable preparation through assigned readings, full attendance and completion of written assignments. The class will meet 2-4 times over the two-year period. The class will be broken into teams and each team will work on a legitimate consulting project solicited through a formal RFP process from a local government client.
