Ventures**

**Put it to work
for you, too.**

“It’s just good business!”

Increase company-wide productivity by providing a solution to Internet abuse. Minitrax monitoring system can reduce personal Internet surfing by up to 95%.

Technology servicing may not be a core business responsibility of most companies. However, dependable and innovative information technology is a necessity. ACS is an IT leader offering a wide range of services customized to your current and future business needs.

Provide immediate answers to your customers' inquiries 24/7. Apalu's AnswerSystem™ technology provides answers to phone and Internet users via an automated service that accesses your company's customized question/answer database.

Microsoft® Interactive Training

Finding time for training sessions is difficult in a demanding marketplace. The TrainingEmployee™, Microsoft Enterprise Learning Library (MELL), allows employees to fit needed training into their busy schedules at their workstation, at their own pace and level.

“Business innovations are improving our customer service and productivity levels.”
