Process Improvement Tools:

Progressive Techniques to Simplify
Government Processes

Craig Rapp, President
Craig Rapp, LLC
Heather Grimes, David Krings, Leonard Martin

Introductions

Craig Rapp- President Craig Rapp, LLC

- Heather Grimes- Pasco County, Florida
- David Krings- TechSolve, former County Administrator
- Leonard Martin- Carrollton, Texas

The Title is Not the Whole Story

This is about Reinventing,
Continuously Improving and
Optimizing

Objectives

Educate Provoke Discuss

Flow of the Session

The Challenge

Concepts

Examples

Ripped from the Headlines

- Central Falls, Rhode Island, Declares Bankruptcy.
- Pinal County, Arizona, Board Votes To Privatize Training Program.
- Foster City, California, Rolls Back Public Safety Retirement Benefits.
- Muskegon County, Michigan, Administrator Makes Departments "Facilitate Teamwork" Over Budget Measures
- Costs Have Public Officials Considering Consolidating Municipalities.
- Frederick County, Maryland, Looking Into Privatizing Government Functions.
- Cities Closing Public Pools, Calling Them "Costly Extravagances."

"The greatest danger *in times of turbulence* is not the turbulence – it is to act with yesterday's logic."

Peter Drucker

Two Mandates-often seen as mutually exclusive

1. Build great communities

Deliver efficient and effective services

Do you have a Great Community?

Do you have a Great Organization?

(an "okay" organization?)

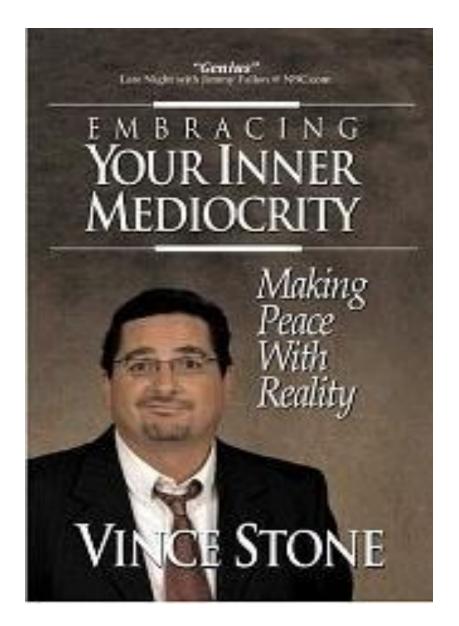

How Do You Know?

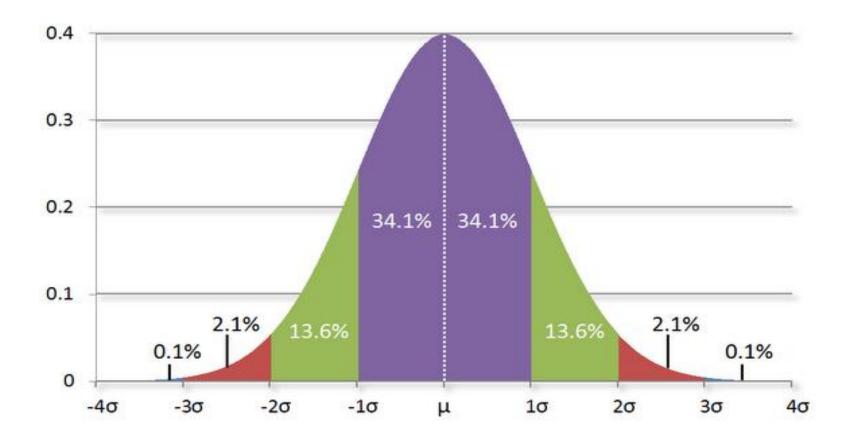

Compared to What?

You do have choices

A Bulging Middle

We all want performance-We chase shiny balloons

50 years of shiny balloons

The 60's

- Quality "0" Defects
- The Managerial Grid
- Toyota Production System

The 70's

- Management by Objectives
- Team (Quality Circles)
- Situational Leadership

The 80's

- Theory of Constraints (TOC)
- Total Quality Management (TQM)
- Malcolm Baldridge Award
- Portfolio management strategic thinking

The 90's

- Continuous Process
 Improvement (CPI)
- Reengineering
- The Balanced Scorecard
- Reinventing Government

The 'latest' movements

- The Price of Government
- Six Sigma (DMAIC)
- Lean Thinking
- Baldridge for Government

Think About:

Performance systems you've tried

Systems still in place

Reasons why the others aren't

The Problem

- Performance not defined
- Roles not clear
- Flavor of Month initiatives
- Approaches not well deployed
- Little best practice learning
- No alignment -strategy, customer, skills, measures

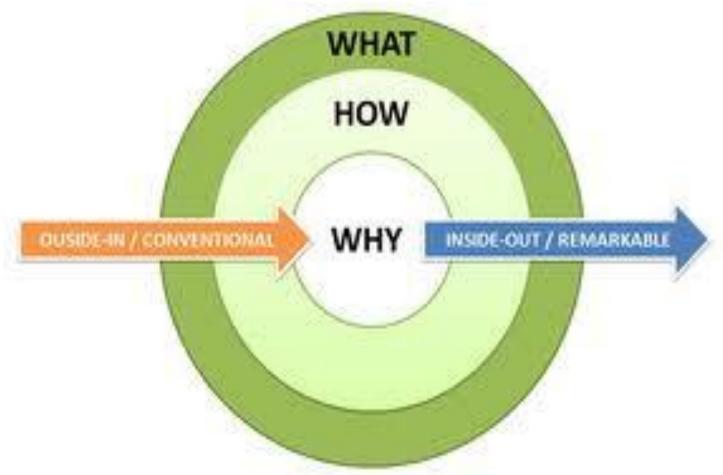

Just Three Things

The Golden Circle - Simon Sinek

"Start with Why"

V O C

Volume of Crap
-or-

Voice of the Customer?

Fix the Pipes -Ken Miller

The Golden Triad

Start with Why

VOC

Fix the Pipes

Purpose & Direction

Needs & Expectations

Deliver Results

Purpose & Start with Why Direction Needs & VOC Expectations Deliver • Fix the Results **Pipes**

Where Are You?

Can't Do

Learn

Won't Do

Manage

Chance To

Change

Optimizing

- If you know Why- lots of ways to get to How
 - Make vs. Buy Analysis
 - Leading Practices/Benchmarking
 - Enterprise-wide approach
 - Service level approach
 - Cooperate, Collaborate, Consolidate
 - Managed Competition
 - Privatize, PPP

Three Different Approaches

 Pasco County, Florida – Sterling/Baldrigeenterprise approach

 TechSolve- Lean Process improvement – leveraging service level change

City of Carrollton, Texas – Managed
 Competition – organizational change

LEAP into Excellence

Heather Grimes, Performance Development Administrator
Pasco County, Florida

ICMA Conference, Milwaukee September 21, 2011

About Us

- Tampa Bay Area
- 464,697 residents
- Total Budget of \$1.1 Billion
- BCC Stats:
 - 19 departments, 53 divisions/sections
 - 1,900 FT employees
 - 48 PT employees
 - 5,000 volunteers

LEAP Introduction

- Fall of 2007, the County launched the LEAP Initiative (Lean, Efficient, Accountable Pasco)
 - County Administrator John Gallagher recognized the need to refocus County Government.
 - Michele Baker hired as Chief Assistant County Administrator and tasked with administering the initiative.

LEAP Introduction (Cont.)

- Initial focus on Internal Process Improvement
- Using the Sterling Business Model for Performance Excellence
- ICMA provided excellent guidance in the early stages of our journey
- Additional guidance provided by a study conducted by the Urban Land Institute

Process Improvement Tools Lean Thinking for Local Government

"It is not the strongest of species that survives, nor the most intelligent, but the one most responsive to change."

~ Charles Darwin

Lean Key Objectives

Satisfy our Customers!!!

- Minimize Cost
 - Eliminate unnecessary expenses
- Maximize Quality
 - Continuous improvement using all available knowledge and capabilities
 - 100% quality, 100% of the time
- Minimize Time
 - Lead Time < Customer Delivery Expectation

Lean can be used to:

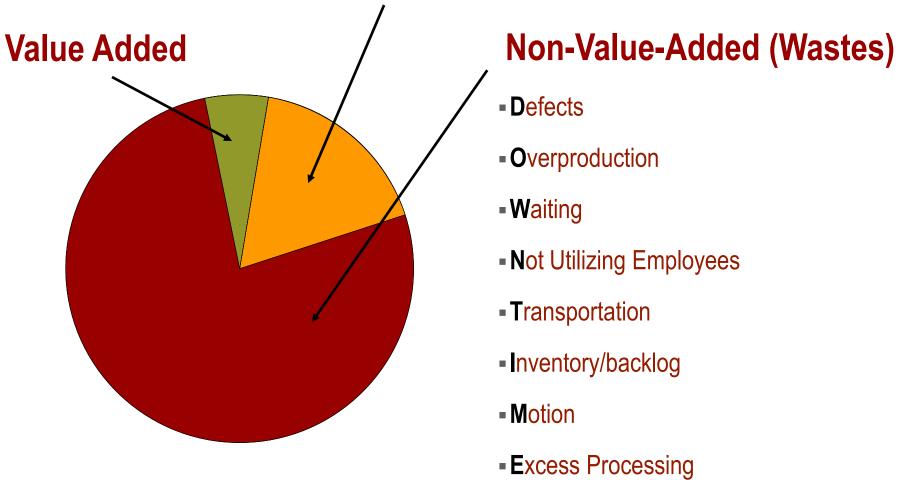

- Shorten the time required to hire
- Reduce the complexity of your building permit process for the development community
- Cut the lead time for making purchases
- Reduce expenses in your judicial system
- Allow you to provide more or better services at the current costs
- Improve processes to "better"

Identifying the 8 Wastes

Non-Value-Added but Necessary

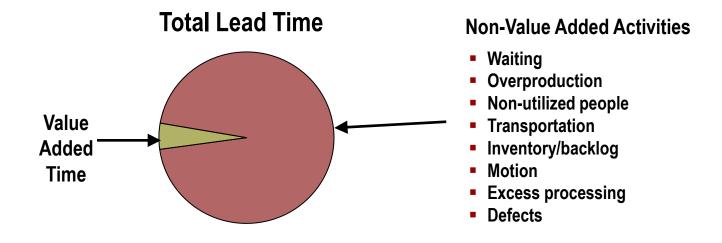

Typically 75-98% of lead time is non-value-added.

Process Redesign

The Public Service Arena: Increase the quantity and quality of services in the face of the public's declining ability/willingness to pay

Typically 95% or more of lead time is Non-Value Added!

Value Stream Mapping

a simple yet effective tool

Value-Added Definitions

Value-Added

- Any activity that increases the market form or functionality of the product or service.
- These are things a knowledgeable customer is willing to pay for.

Non-Value-Added

- Any activity that does not add market form or function and is not necessary.
- These activities should be eliminated.

Non-Value-Added but Necessary

- Any activity that does not add market form or function but is necessary with the current process.
- These activities should be eliminated, simplified or reduced.

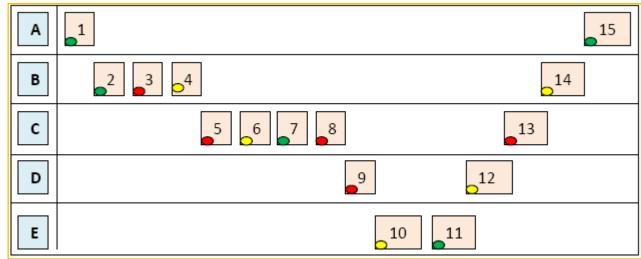

VSM - Current State

Documented:

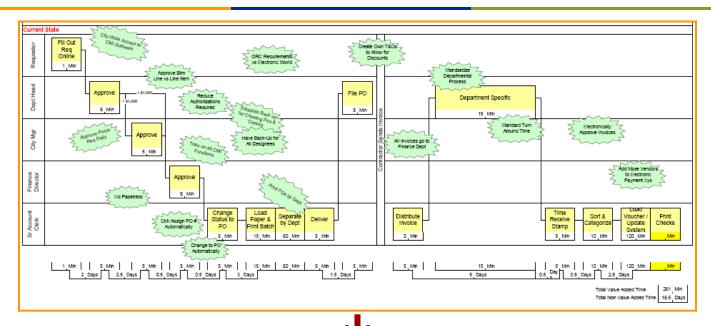

- Steps
- Timing
- VA / NVA / NVAN
- Improvement opportunities

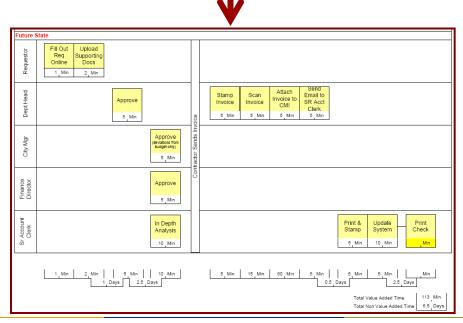

VSM - Future State

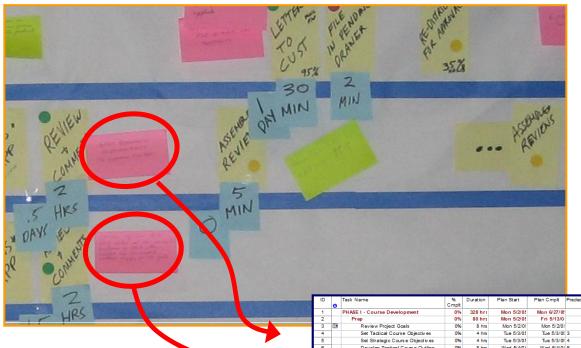

Where do we want to go?

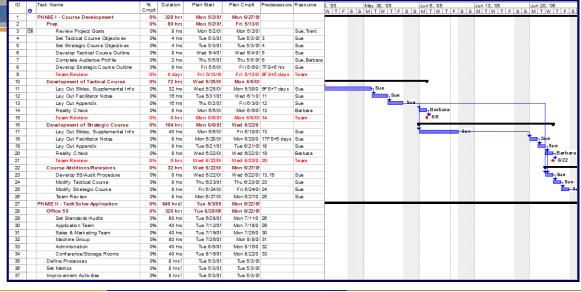

VSM – Implementation Plan

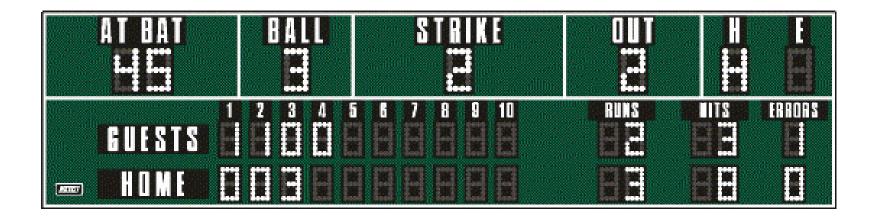

- Opportunity
- Impact
- Timing
- Resources

Metrics / Measurements

 Simple signals that provide an immediate understanding of the situation or condition

VSM – Tracking Center

Starting a Lean Program / Creating a Lean Culture

Starting a Lean Program

Must:

- Communicate ground rules and goals upfront
 - Including that no one will be laid off as a result of Lean improvements
- Recognize that the line workers are the process experts
- Not imposing "management solutions"
- Require top management support

Suggested:

Training for management and/or staff

Optional:

Lunches, picnics, etc.

Focus Areas

- Typical processes with potential for improvement:
 - Hiring Process
 - Procurement Process
 - Building Permit Process
 - Municipal Court Process
 - I.T. Project Prioritization Process
 - Accounts Payable and Accounts Receivable

Composition of a Lean Team

Cross Functional

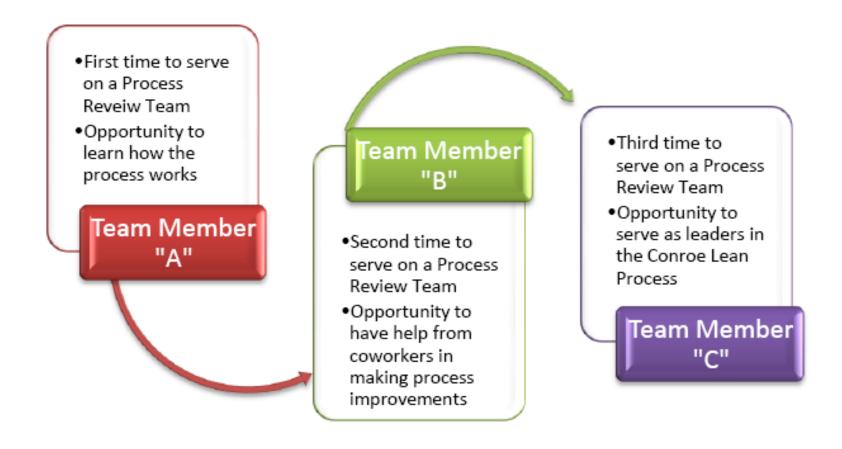

- Across the organization
 - Members from outside the department / process
 - Process Owners
- Up and down through the organization
 - Management level
 - Operational level

Ideal Size

- 7 to 14
- Depending on process

Participant Involvement

From the Conroe Lean program

Case Study – City of Conroe, TX

Created Lean Culture

Situation

- Rapid increase in population
- High sales tax revenue
- Ensure good stewards of public funds
- Created Lean Champion

Results

- Over 30% reduction in permitting process lead time
- PR win by restructuring swim lesson sign-up process
- Over \$2,000,000 of savings from project improvements

Case Study – Sewer District

Receivables Process

- Before process improvement event
 - Sampling and permit fees collected separately
 - Up to four bills per customer per year
 - Up to 2.5 years to collect sampling fees
 - Billed for permit at end of the permit year
- After process improvement event
 - One bill at the beginning of the year
 - Reduced processing time by over 50%
 - Millions of dollars in increased cash flow

Quotes

- "The process brought out several small changes that are easy to implement, yet have a significant impact and savings."
 - Process Owner, Texas

- "People come away with a much better understanding of our role as 'stewards' of public funds."
 - City Manager, Ohio

- "Our staff was apprehensive and skeptical...[now] we are well on our way to many lean thinking successes."
 - City Manager, Texas

Public Relations

- How some jurisdictions are gaining positive PR from Lean efforts:
 - Determine what is "better"
 - Measure to ensure results
 - Share results with elected officials
 - Invite elected officials and possibly local media to participate in celebrating results
 - Be careful not to turn an administrative process into a political process

Questions

?

Alternative Service Delivery Options Workshop

ICMA Conference September 21, 2011

Leonard Martin
City Manager, Carrollton, Texas
CEO, Martin Management

Only Two Choices?

Cut services or programs?
 OR

2. Raise Taxes?

OR

3. Transform culture to a competitive Service Business -- reduce costs, adopt best practices and increase employee productivity...

How is MC different than Outsourcing and Privatization?

- In outsourcing, the organization has already made the decision to use an outside contractor but is still responsible to ensure customer satisfaction
- In **privatization**, the organization sells the operation's assets and exits the business
- In managed competition, in-house units restructure, innovate and compete against external contractors to provide services under contract

Benefits of Becoming Competitive

- Transforms the organizational culture
- Empowers employees
- Cost savings = better value for customers
- Reduces waste and inefficiencies
- Increases the sense of urgency
- Improves internal coordination and cooperation
- Improves customer service
- Frees up resources for other priorities

Managed Competition Process

The Goals

- Provide services that are competitive in quality and price ("best value")
- Adopt industry best practices
- Continuous improvement over time

The Approach

- In-depth competitive & operational assessment
- Identify competitive gaps
- Competitive readiness period
- Select "best value" provider for the city
- Sign a service contract (SLA)

Steps To Competitiveness

- 1. Encourage an external focus
- 2. Be proactive not reactive
- 3. Educate employees so they shift from entitlement to ownership
- 4. Management commitment to win; make the tough decisions
- 5. Increase employee communications; empower good employees
- 6. Reorganize work teams- drive accountability down to the front-line
- 7. Understand and learn from your competition
- 8. Continuously improve

Shifting the Paradigm...

Traditional Gov't

Service Business

Entitlement attitude

 \rightarrow

Productivity/results

Professional driven

 \rightarrow

Market driven

Special interest driven

 \rightarrow

Customer focused

Monopoly (closed)

 \rightarrow

Competition (open)

Morale obsessed

 \rightarrow

Performance driven

Process oriented

 \rightarrow

Results oriented

Wanting to be liked

 \rightarrow

Bottom line focused

Shifting the Paradigm...

Traditional Gov't

Service Business

Single business unit focus

 \rightarrow

Efficiency + Effectiveness focus

Specialized job/skill silos

 \rightarrow

More versatile generalists

Risk aversion

 \rightarrow

Smart risk-taking/try it

"Safety net" staffing

 \rightarrow

Low/Avg demand; add temps

Service based on tradition

 \rightarrow

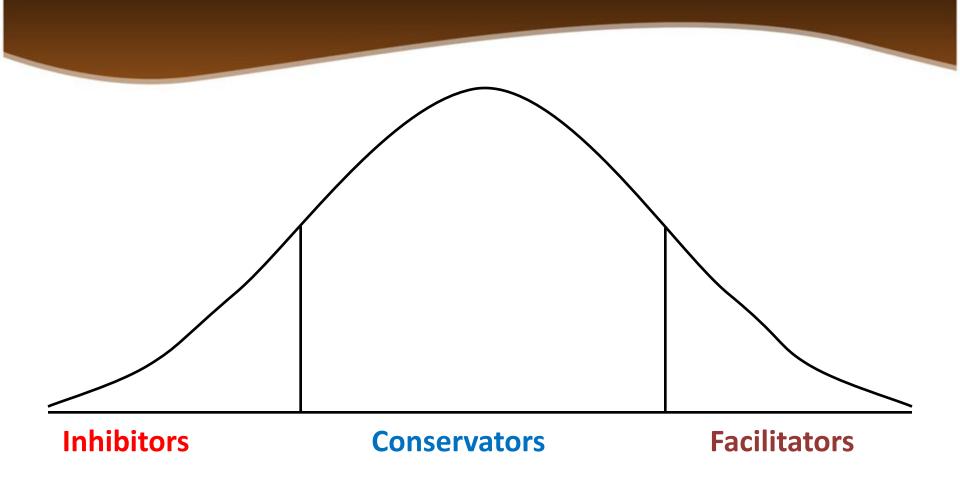

Customer need based services

Compare to other cities

 \rightarrow

Market competitiveness

Typical Organization Culture

Meeting Customer Needs with Fewer Employees

Department Service Agreements

- Departments declared "Substantially Competitive" execute service agreements
- Agree to same inputs & outcomes a private vendor would be required to sign
- At victory celebration all employees sign along with City Manager
- The performance standards are monitored & business unit is held accountable for performance

Why Managed Competition Works

- Political leadership is committed and involved
- Community political climate is open to change
- Marketplace dynamics
- Management must be courageous and leaders of change
- Employee communication, involvement and motivation are important

Challenges of Becoming A Competitive Service Business

- Threatens the "Inhibitors"
- Takes Time to Change Mind-sets
- Requires a Dedicated Resource
- Requires Commitment and Action
- Can Impact Morale in short-term
- May Cause Reductions in Staffing
- May Increase Employee Turnover--a good outcome

Where Connections Happen

Leonard Martin City Manager, Carrollton, Texas CEO, Martin Management

"It is common sense to take a method and try it. If it fails, admit it frankly and try another. But above all, try something."

- Franklin Delano Roosevelt

"If you always do what you've always done, you'll always get what you've always got"

Anonymous
