

Sustainability Lessons in Small Towns and Rural Communities

Maria Lasday, Village Manager
Village of Bannockburn
ICMA Conference Presenter

Village of Bannockburn

- Population consists of corporate, residential, retail and college sectors
- 25,000 daytime population
- 1583 evening population
- 2 ½ square miles

Bannockburn's Stormwater Conditions in 2008

- When I began my current Village Manager position with Bannockburn in April 2008, Stormwater Management was a serious issue.
- After heavy rains, severe flooding occurred.
- FEMA funds obtained due to stormwater damage and costs of clean-up in 2008.

Example of Flooding in Bannockburn 2008

Approach to Solve Flooding Problem and Reduce Cost of Clean-up: Green Solutions

- Incorporate Solutions into the Village's 5 Year Strategic Plan and Capital Plan
- Seek Grants
- Educate Residents, Businesses and College
- Lead by Example
- Implement Best Management Practices

Bannockburn Best Management Practices

- Preservation of Wetlands
- Encourage Wildlife Habitat
- Installation of Rain Gardens
- Installation of Bioswales
- Removal of Buckthorn and Invasive Species
- Installation of Native Plantings
- Encouraging Pervious Surfaces (Porous Pavers, Porous Concrete Sidewalks & Turfstone Grass Parking Spaces)
- Naturalization and Landscaping of Detention Ponds

Goal for Rain Gardens and Bioswales: Infiltrate Storm Water Runoff During a Rain

Village of Bannockburn Projects

1. Best Management Practices - Village Hall Location
 - Rain Gardens
 - Wetland Creation
 - Bioswales
2. Local Roads
 - Rain Gardens Installed in Depressed Areas in ROWs
 - Bioswales
3. Village ROW – State ROW - Various Locations
 - 8 Rain Gardens
 - 3 Bioswales

Examples of Roadside Rain Gardens in Right of Way

Residential Projects

- Rain Garden Program Implemented in the Residential Program – up to \$2,500 grant per rain garden.
- Goal of Program - keep water on own property and water back into aquiver system. Be good to the environment and thy neighbor.
- Program a Success. Residents installing rain gardens
- Educating Residents is key to success.

Incorporation of Best Management Practices – State Widening Project - Ideal in the Depressed Areas and Wetland Areas

IDOT Incorporation of 8 Rain Gardens into State Widening Project Plans – Including 3,500 sq. ft. on Trinity University International Property

Bioswales Incorporated into the Route 22 Widening Project Similar to other Village Bioswales

2013: Bioswale Captures Water from Heavy Rain

Summer 2013 – Record Rainfall in Illinois

- State qualified for FEMA funds
- Neighboring Communities had roads closed
- In 2013, Bannockburn did not qualify for FEMA funds (minimum threshold - \$1,000). Less than \$1,000 spent for clean-up. No roads closed in Bannockburn.
- In 2008, Bannockburn received approximately \$50,000 in FEMA and State funds for costs related to heavy rain storms.
