### Today's Agenda

- Perspective about challenges for today's local governments
- Common perceptions and misconceptions about procurement
- Opportunities and strategies for savings
- What to do next

### Perspectives on spending

4958

# Cash is tight for everyone

### Your Culture

- Cost control is a culture and mindset first; techniques, policies and procedures second!
  - Does everyone spend money like it is their own?
  - Does the team understand the effects savings could have on raises, bonuses and other performance incentives?
  - Are savings ideas acknowledged are suggestions encouraged and followed up on?
  - Do employees understand the relationship between savings versus the quality of your services, i.e., savings are important but quality and services may come first.

### C-Level Exec's surveyed said:

Source: CFO Magazine

In your opinion, how well is your company currently performing at the following cost-management activities?

Identifying opportunities to

administrative processes

in order to make cuts

consolidate spending with fewer vendors

Streamlining/automating/outsourcing

Helping employees adapt spending

behavior to business circumstances

Identifying non-essential spending

Comparison shopping/benchmarking

offerings for price, service, and quality

Negotiating better deals with vendors

Ensuring compliance with contracts

and other negotiated sales agreements

(e.g., price reductions, better service, better quality)

Monitoring spending/analyzing spending variances

Enforcing current spending policies (e.g., policies

for expense submission, purchase preauthorization)

41% 47% 12% 41% 47% 12% 40% 50% 10% 37% 20% 37% 46% 17% 46% 37% 18% 46% 31% 24% 29% 24% 47% 24% 56% 20% 0% 20% 40% 60% 80% 100% Adequate performance Excellent performance

Despite recent improvements, a substantial number of respondents see room to improve on a wide range of costmanagement activities

### Common misconceptions

### **Common Misconceptions**

- Pricing from suppliers is applied evenly to similar customers.
- Your expertise in purchasing in one cost category will produce similar results in another.
- National pricing agreements (e.g., GPOs) are always better than local or regional agreements with the same company.
- Loyalty to a supplier translates into best pricing and service.
- Volume will get me you the best deal.

### The **Opportunity**

### Cost reduction can generate cash

	Baseline	20% Cost Reduction
Taxes and other Revenues	\$ 100	\$ 100
Direct operating costs	\$ 35	\$ 35
Labor costs	\$ 35	\$ 35
Other costs – supplies, etc.	\$ <mark>20</mark>	\$ 16
Net Cashflow	\$ 10	\$ 14

How many new taxpayers would you need produce \$4 in funding? How much of a tax increase would it take to generate \$4 in cashflow. How many more fees or other revenue activities would you need to produce \$4 in additional cashflow?

### Typical cost reductions by expense category

# Expense management challenges

### **Expense Management Challenges**

- Multiple suppliers and multiple order points.
- Staff and management have **limited time and resources** to address non-strategic costs.
- Employees with **limited purchasing experience** are making buying decisions.
- Lack of benchmark data to evaluate vendors.
- **Incomplete knowledge** of vendors' competitive position in the marketplace.

# Steps for expense reduction planning

### **Expense Reduction Planning**

- Identify components of non-personnel operating expenses starting with your General Ledger and a comprehensive supplier analysis
- Establish an overall strategy for cost reduction
- Develop a goal over a minimum threshold for each expense category – how much would you need to save to justify switching suppliers
- Establish expectations for each person who will participate in the process
- Measure results!

Take a fresh look...

Ask your suppliers what you can do to reduce costs

# Review processes

Look at what you **pay** for the goods and services you buy.

### Ask your vendors to help you manage your spend

Create a competitive environment

ICA

### The **bottom** line

#### To get best market pricing and terms:

- Use benchmark data (your own, plus market data)
- Utilize cost-category expertise (each category has its own pricing model, methodologies, jargon, etc.)
- Put yourself in the shoes of your suppliers
- Become a better customer to suppliers
- Keep suppliers competing for your business

**Questions** you should ask to find savings in common expense categories...

### Office/Medical/Janitorial Supplies (and similar types of commodities)

### **Office/Medical/Janitorial Supplies**

- Are you buying your supplies from one supplier per category, if possible?
- Do you have purchasing policies for supplies including minimum order size, contract item list, who can order items not on the contract list, etc.?
- How do you control product price increases?
- How do you audit supply transactions to insure there are no overcharges or substitutions without your approval?
- Are you receiving incentives/rebates for electronic ordering, average order size, or your annual volume?

Merchant Card Processing Fees

### **Merchant Card Processing Fees**

- Is your current fee structure optimized for your business?
- Up to 95% of the cost of processing a transaction is dictated by process, not pricing. Are you fully compliant with the rules and conditions required to obtain the optimum card association rates?
- The card associations offer beneficial rates for specific industries or card types. Could you be eligible?
- Are you confused by the various platforms, gateways and myriad of options available to process merchant card transactions?
- Do you have the tools and reports needed to manage this area of expense properly?

### Information Technology

### **Information Technology**

- Have you recently reviewed your standards & brand loyalty for: Configurables, Commodities & Consumables
- What hardware maintenance contracts are in place?
- Do you lease or buy? Centralized or decentralized IT purchases?
- Have outsourced services been explored?
- Have you recently conducted an Asset Audit?
- Does your current strategic IT process match your current mission?
- Might you reduce costs by pursuing an IT Alignment Study?

### **Telecom**munications

(CT \$1117

LAN

1877

2

STATUS

STATUS 🔵

### Telecommunications

- Have you done a comprehensive review of your voice, data and wireless communication services?
- Can you reduce the number of suppliers to achieve greater discounts?
- Can you leverage new technologies to reduce costs?
- Have you audited historic invoices in order to obtain credits for incorrect billings?
- Service, Billing and support issues cost you money are these under control?
- Are you using all the services that you are paying for?
- Have you terminated those old fax lines?

## INSURANCE

Insurance & Risk Management

# Insurance & Risk Management

- Is your organization maximizing the return on its insurance expenditures? Are you transferring risk appropriately?
- Have you completed a risk assessment/gap analysis and determined any gaps in coverage or overlapping or duplicative coverages?
- Is your broker or agent being compensated in a manner that puts them on your side of the table? Has the incentive of higher commissions been neutralized?
- Do you know the types of coverages similar companies are carrying and the premiums they are paying?

# Fleet Management

THE OWNER

-

"star

I me

12

CHEVROLET

# Fleet Management

- Are you able to measure your vehicle lifecycle costs as a cost-per-mile?
- How tightly is the fuel purchase process monitored to minimize risks associated with waste, fraud and abuse?
- Can some of your fleet administrative tasks be more efficiently outsourced?
- Are you maximizing resale when disposing of your vehicles?
- Have you evaluated the cost of vehicle downtime due to maintenance?

# **Food Service**

TUNICIA CONTRACTOR

U. Laborar

# **Food Service**

- Are you leveraging your buying power by consolidating your suppliers or are you cherry picking each order, thereby increasing transactions and transaction costs?
- If I consolidate, how can I control price creep?
- How are you controlling price increases? How do you really know the pricing model your supplier is using?
- Can you retain quality while and still pay a lower price?
- Are you tracking your inventory, spoilage and other KPIs for your food service operation?

# GPOs --- One Size Fits All?

# Leveraging a GPO?

- We are members of a GPO(s), doesn't that generate me savings?
- Does the GPO pricing reward you for the value of your spend or the average member's spend?
- Does the GPO pricing take into account your specific requirements and purchasing profile?
- Do the GPO's incentives conflict with your own needs?
- GPO commission from the suppliers.
- Manufacturer rebates do I benefit from these?

0

# **Action** Plan

- Develop an overall cost-management strategy
- Develop cost-reduction goals for each category
- Set expectations for each person who will participate in the cost-management process
- Set a timeline for results
- Audit savings on an ongoing basis

# **Obstacles to Maintaining a Cost Discipline**

Percentage of respondents Respondents were asked to choose up to three answers.

# Action Plan to Overcome Organizational Resistance

- Communicate the case for the cost management project.
- Assign an impartial project leader for each cost category to ensure an unbiased and objective review.
- Meet with stakeholders, define what a successful outcome is and confirm their support for the projects in those categories under their management.
- Thoroughly document the organization's past and future spends for each category under review.
- Use a formal and unbiased RFP process to create competitive tension and reinforce the objectivity of any changes to internal stakeholders.

# Procurement Best Practices

### Great

- Categorize spends
- Identify usage patterns
- Update requirements based on current spends
- Identify competitive offerings from new suppliers
- Include multiple suppliers for RFP process
- Share purchasing data with suppliers

### **Exceptional**

- Understand supplier's pricing strategy for spend category
- Compare supplier pricing to current, industry benchmark pricing
- Weight solutions of each supplier based on criteria set internally
- Defined procurement process designed to minimize staff time
- Audit monthly spend to ensure contract compliance
- Manage stakeholder buy-in
- Repeat as required

### Good

- Quantify spends
- Monitor quality and service levels
- Obtain revised pricing from current vendors on a regular basis

### **Action Plan for Expense Management**

#### **Collaboration:**

Ask your suppliers what you can do to reduce costs. Working with your suppliers to identify waste and inefficiencies

Takes the cost out of the supply chain in such a way that both parties benefit financially

#### **Consolidation:**

Consolidate your purchases By purchasing more you pay less per unit

LOOK AT WHAT YOU PAY FOR THE GOODS AND SERVICES YOU BUY

#### **Contracting:**

Ask your vendor to help you manage your spend Companies guarantees suppliers long term contracts Large volumes are a distinct incentive for the supplier to negotiate a better price

#### **Competition:**

Create a competitive environment

Suppliers bid on their requirements

Producing a healthy air of competition that drives down costs.

# **Consider Outside Resources**

- Consultants have access to proprietary Benchmark Data (price and service) across a wide range of expense categories.
- They know the types of deals/incentives currently being offered in a given market.
- Knowledge is power using a consultant puts a category specialist on the client's side of the table.
- They know the industry tricks in the bidding process and thereafter.

# Review

- Added perspective about cost management challenges and solutions to address them
- Common perceptions and misconceptions about procurement
- Opportunities and strategies for savings
- What to do next

Cost reduction/containment has to be driven from the top down. It must become part of your culture!
