

2013 Annual Awards Program

Program Excellence Awards Nomination Form

Deadline for Nominations: March 8, 2013

Complete this form (sections 1 and 2) and submit with your descriptive narrative.

SECTION 1: Information About the Nominated Program

Program Excellence Award Category (select only one):

Community	Health	and	Safety
-----------	--------	-----	--------

Community Partnership

- Community Sustainability
- Strategic Leadership and Governance

Name of programRock Hill, South Carolina: Proing Accoutability andbeing nominated:Transparency

Jurisdiction(s) where <u>City of Rock Hill, SC</u> program originated:

Jurisdiction <u>67,243</u> population(s):

Please indicate the month and year in which the program you are nominating was fully implemented. (Note: All Program Excellence Award nominations must have been fully implemented by or before January 31, 2012, to be eligible. The start date should not include the initial planning phase.)

Month:	<u>10</u>	Year:	<u>2009</u>
--------	-----------	-------	-------------

Name(s) and title(s) of individual(s) who should receive recognition for this award at the ICMA Annual Conference in Boston, Massachusetts, September 2013. (Each individual listed MUST be an ICMA member to be recognized.):

Name:	David Vehaun		
Title:	<u>City Manager</u>	Jurisdiction:	<u>City of Rock Hill,</u> <u>SC</u>
Name:	<u>Monica Croskey</u>		
Title:	<u>Budget &</u> <u>Performance</u> <u>Manager</u>	Jurisdiction:	<u>City of Rock Hill,</u> <u>SC</u>

SECTION 2: Information About the Nominator/Primary Contact

<u>Monica Croskey</u>

Rock Hill, South Carolina: Promoting Accountability and Transparency

A. Problem assessment, challenge, or need that prompted the program

Like many local governments, Rock Hill has engaged in strategic planning and financial reporting for years, producing an annual budget document that provides information on revenues and expenditures, performance measures, and the organization's vision and goals. While our budget document serves an important role, with a printing frequency of only once a year and a page count that exceeds two hundred, its limitations are apparent. In general, with the continuation of the "internet age", the public's appetite for accessible information will continue to grow. The public will become less and less satisfied with waiting for the annual printing of budget documents to be informed about how their governments are performing. Additionally, citizens will become more interested in knowing how public resources are being used by public servants. It has been said that citizens will begin viewing themselves as investors, and conversations will shift from "how much are my taxes and rates" to "what returns am I getting for my public investment." Rock Hill's efforts are a proactive response to recognizing the shift in citizens' expectations. Additionally, Rock Hill sought to increase the financial awareness of its organization and community and to use performance management in a manner that would impact its operational practices and the organization's culture in meaningful ways. Since their 2009 launch, our performance progress reports and performance and financial dashboards, have evolved into an accountability and transparency system that influences decision making and provides useful information to departments, elected officials, and the community.

B. Program implementation & costs

Accountable performance management:

Rock Hill's strategic plan goes beyond aspiring for robust economic development or safe neighborhoods in our community; our strategic plan clearly states how success will be defined.

Whether the goal is to add 125 new jobs in three years or to reduce violent crime by two percent annually, the standards by which the City will be judged are explicitly stated in our strategic plan. Each year the City produces Mid-Year and Year-End Progress Reports that quantify the City's progress at meeting the performance standards that were set in the strategic plan. The reports are provided to our City Council and made public on the City's website. The Mid-Year Progress Report is discussed page-by-page at the Mid-Year (January) Retreat with staff, Mayor, City Council, and media present. Whether it is a green dot (signifying success) or a red dot (signifying significant challenges) that catches a councilmember's eye, department heads are called upon to discuss and account for performance. To complement the semi-annual progress reports, the City developed a Performance Dashboard that communicates the City's progress on addressing many of the goals within the Strategic Plan. The Performance Dashboard is updated monthly and available on the City's website (cityofrockhill.com/transparency).

Transparent financial reporting

Traditionally City departments and the public received financial information twice a year– during budget development for an upcoming fiscal year and again at the ending of a fiscal year. Outside of those semi-annual conversations, financial data seemed to be mysterious information that only Finance and Budget staff could access. Now, the Financial Dashboard, which is available on the City's website, uses easy to understand graphs to provide monthly updates on revenues by source (e.g., business licenses, water and sewer revenue) and expenditures by department (e.g., police, public works, fire). Both revenue and expenditure data are compared to budgeted amounts, making it easy to know when a department is over budget or when revenues are underperforming.

With the development of the progress reports and launch of the performance and financial dashboards, emphasis is not only placed on managing financial resources, emphasis is now

placed on how well the City uses those resources to successfully meet the goals that have been set. Departments, our governing body, and community no longer have to wait for the annual printing of the budget document to access performance and financial information. In turn, the accessibility of the information has created a level of transparency and accountability that has impacted our organization's culture and business operations.

Costs

The strategic plan document, semi-annual progress reports, and financial dashboard were all developed and produced in-house. For its first performance dashboard, which launched in 2009, the City used a consultant to design and develop the performance dashboard (\$12,000).The City developed its new Performance Dashboard, which launched in July 2012, in-house.

C. Tangible results and benefits of the program

While there have been numerous benefits, one of the most notable results from our efforts is the development of a culture that values data driven decision making. As an example, during a retreat with City Council and senior management, the decision was made to establish a task of identifying the top ten electric outage areas within the City. A councilmember then noted that it would be useful to have this data during budget discussions for electric capital improvement funding. While this may seem simple, it is indicative of how we have come to value the use of both performance and financial data in decision making. The City's performance management efforts have permeated the organization by setting the expectation for data informed decision making; the analysis and use of data has become a standard business practice in our service delivery. Additionally, our strategic planning efforts have impacted interdepartmental relationships. The transparent and accountable nature of our system has motivated departments to use all resources available to them - this includes reaching out to one another - in efforts to accomplish goals. Interdepartmental communication and planning has increased tremendously. For example, the

Electric Division, Police Department, and Sanitation Department met to discuss how police presence, street lighting, and litter-free streets all play a part in improving the perception of downtown safety. By increasing financial and performance awareness amongst departments, City Council, and the community, we are championing the principles of accessible, open government.

D. Lessons learned and transferability

All local governments have stakeholders who are interested in knowing what outcomes are being achieved with the resources being invested. Consequently, the need to make data informed decisions and to report on performance is widespread. Any organization can adapt Rock Hill's efforts to fit their needs. The most significant investment an organization would need to make when duplicating Rock Hill's efforts is establishing a culture that embraces the level of transparency and accountability that these efforts will bring. As a result of our efforts being featured in webinars, national and regional conferences, and several publications, we have had the opportunity to share our experience with jurisdictions from across the country. We have hosted one-on-one visits and conference calls with jurisdictions that contact us for more information and guidance on how we have implemented our efforts.

To maximize the benefits, it is imperative to go beyond simply collecting data. An organization must reflect, discuss, and share data with elected officials, employees, and the community. This will gradually create an appetite for data informed decision making.

 (Right) Our efforts have been featured in many publications, including being used as a case study in the 2010 Performance Management Advisory Commission's report titled: A Performance Management Framework for State and Local Government: From Measurement and Reporting to Management and Improving.

PUBLIC SAFETY					
Tasks (in bold) and Performance Indicators	Target	Mid-Year Actual	Annualized Projection	Quick View	Comment(s)
Implement operational procedures in support of the Police Stoffing Study Conduct Patrol Beat Analysis annually	By 1/1	December 2009	N/A	•	As a result of the analysis, staff conducted that the number of patrol zones needed to increase from sixzones to eight zones. This change will occur during the third quarter of 2010.
Evaluate civiliarizing the Forensics positions and present recommendation to Gity Management	By 1/31/2010		N/A		On track to meet target.
Revise patrol sched ule	By 7/6/2009	7/6/2009	N/A	•	The patrol schedule was revised to a four days on/four days off schedule. Every other month, each shift has training, court, and directed patrol worked into the schedule.
implement computeriaid ticketing system	By 1/1/2010	Goal Not Met	N/A	•	The SC DNW has perchased the E-Ticken in solution and is cur- rently in the testing stage. It is expected that the E-Ticketing product will be made available to local agendes during the 2010 calendar year. The Cityhas grant funding available for the 2010 calendar year to purchask hardware (printer) al and to povide for the implementation costs, including the connectivity to the department's Records System.
Update jail costanalysis	By 6/30/2010		N/A	0	On track to meet target.
Objective: Monitor the effectiveness of operational activities and the	ir effect on red	lucing crime	and improv	ing publ	ic satisfaction
Evaluate crimes against persons and exceed nations standards in perform- ance benchmarks Reduce viclent crime per capita. from three year trend	2% annually FY2010 goal – 11.8	5.5	11.1	0	366 inddents
Exceed the national cleanance rate a verages for crimes against persons (national rates follow a calendar year)	2 percentage points above		N/A	0	The 2009 Uniform Crime Report has not been released by the FBL A preliminary report, which did not provide deatance rate data, was released on December 21, 2009.
Evaluate crimes against property and exceed national standards in per- formance benchmarks Reduce property crime per capita from three year trend	2% annually FY2010 goal – 50.1	25.0	49.9	0	1,651 incidents
Exceed the national clearance rate a verages for crimes against property (national rates follow a calendar year)	2 percentage points above		N/A	0	The 2009 Uniform Clime Report has not been released by the FBI. A preliminary report, which did not provide dearance rate data, was released on December 21, 2009.
Provide effective and efficient Police Services Reduce the number of collisions in the City's Top 5 Collision Areas by 5%	FY2010 goal - 169	89	178	0	The annualized projection is within 10 accidents of the goal.
Respond to Priority 1 calls within 5 minutes	80%	48%	N/A	•	The revisions to patrol zones and the addition of 12 new Police Officers will allow for improvement in response times.
