

SeeClickFix

Municipal Tools for Service Request Management

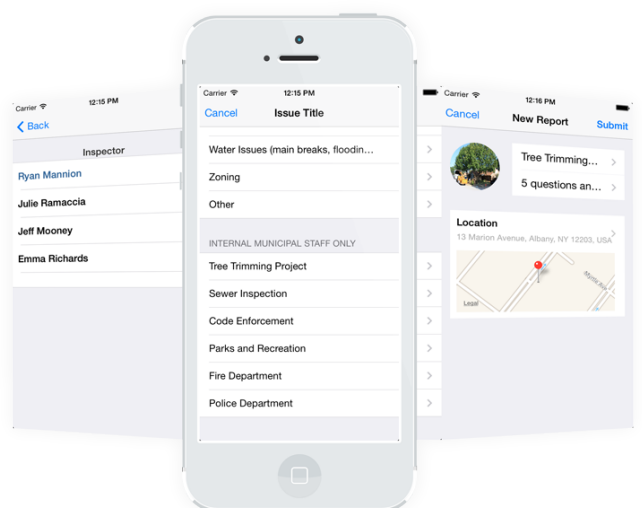

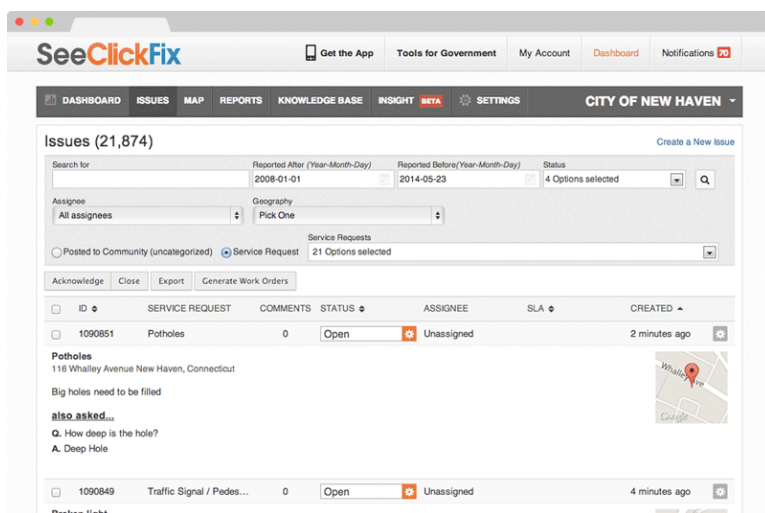

Citizens use SeeClickFix to connect with local government

Citizens use mobile apps and website widgets to submit service requests, find information and receive targeted notifications in real-time.

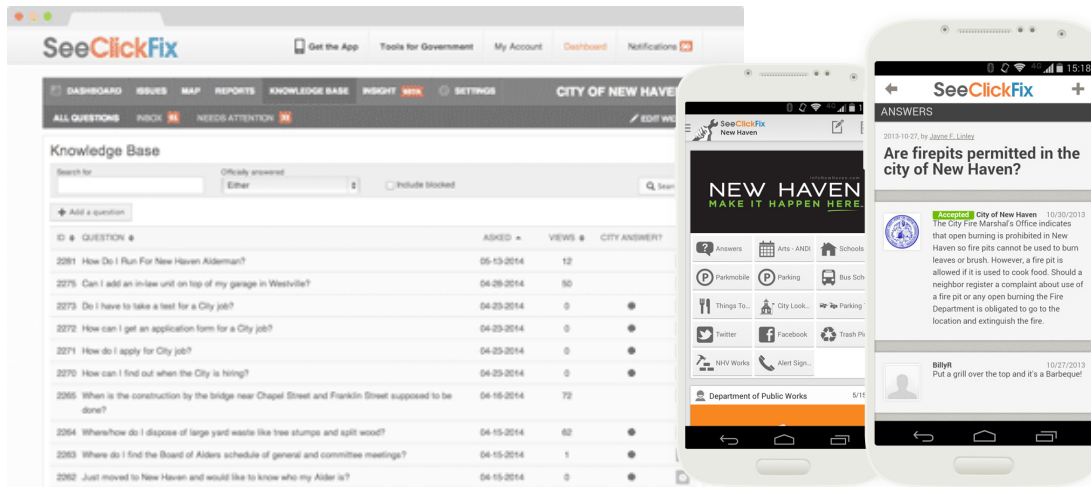

Municipalities route requests, assign work and engage with citizens

Officials use SeeClickFix hosted tools to set up automatic routing, manage workflow and seamlessly engage with citizens. SeeClickFix also integrates with your current work order systems, allowing for automatic and synchronized communication between city officials and residents.

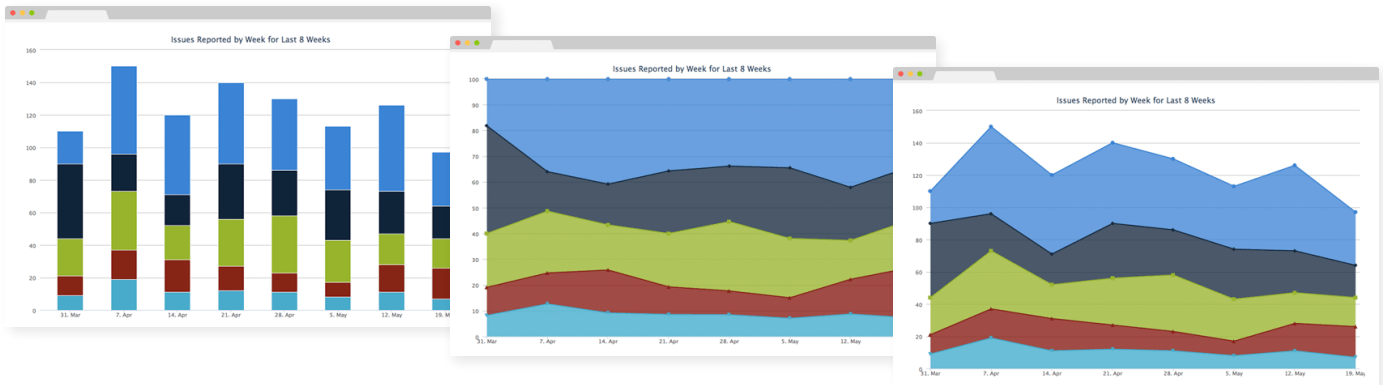

Knowledge Base offers self-serving, self-improving FAQ

City staff and citizens are able to access frequently asked questions as well as ask new questions and track engagement from iPhone, city website and the hosted CRM.

Agencies use Insight to generate powerful reports

Partners utilize SeeClickFix Insight to sort, analyze and report on a wide variety of city data. Easily connect other platforms, for **city-wide analytics**.

SeeClickFix works with hundreds of municipalities

SeeClickFix works with towns, cities, counties and independent authorities of all sizes. Give us a call today to see how we can help your agency!
